1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 8-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Harrison US 3,136,696. The reference shows a composition comprised of a surfactant combination wherein the combination requires a non-ionic surfactant and an anionic surfactant. See column 1, line 49 through column 4, line 35. The formulation that is utilized for shaving further comprises a humectant such as glycerol, polyethylene glycol, and sorbitol. Table 1 column 3, shows a range for the anionic surfactant of .01 to 10 percent by weight a range for the non-ionic surfactant of 1 to 25 percent by weight, and a range for the polyol of 1 to 20 percent by weight. Water is present in a range of 10 to 80 percent. The reference clearly shows the shave compositions of applicants' claims and one skilled in the art would immediately envision equivalent combinations of such anionic and non-ionic surfactants.

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The Daniel et al reference US 5,891,449 and Nielsen reference US 5,100,697 show surfactant combinations that may be of interest. See Daniel et al columns 4-5. Nielsen column 5, lines 54-62, column 7, lines 1-11.

Claims 8-17 are rejected.

Claims 1-7 have been canceled.
